ABOUT ME

 I am a front end developer having six months of experience. I am proficient in markup language including HTML5 CSS3, SCSS bootstrap and angular and react JS The primary focus of my studies in web development has been Html, CSS, Bootstrap, JavaScript and some React. I have created multiple websites and I have also volunteered my time to gain professional level experience using these skills. I recently turned my focus to improving my JavaScript skills by working more with vanilla JavaScript and learning ReactJS.
